## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claim 19 is rejected under 35 U.S.C. 102(a) as being anticipated by Visser [6577219].

Visser discloses an inductor with plurality of windings 210, 220 symmetric about the center of the inductor and being arranged in common plane [claim 1; figure 2].

### *Allowable Subject Matter*

3. Claims 1-18 and 20-28 are allowed.

Claims 1 and 20 recite inter alia, *each of the plurality windings has a different size compared to the other windings; at least a first conductor crossover conductively connecting one winding of the plurality of windings with another winding of the plurality windings.*

The references of record do not teach or suggest the aforementioned limitation, nor would it be obvious to modify those references to include such limitation.

*Conclusion*

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Goff, Carpentier, Castaneda et al., Lowther, Iida, Kyriazidou.
